## **Logic Design Corporation Announces the Release of “Global Edge® – Product Configurator” Software**

*—Global Edge Provides Manufacturers the Power to Succeed in a Global Market—*

**BROOKFIELD, Wisconsin—May 28, 1999—**Logic Design Corporation, a leading producer of Engineering Workflow software, announces the release of *Global Edge® - Product Configurator*.

*Global Edge® - Product Configurator* is an innovative software solution designed especially for manufacturers of highly engineered products to provide a simplified method to quickly expedite the process of moving accurate design information through engineering to the shop floor.

*Global Edge® - Product Configurator* allows engineering to easily develop product configuration rules that the sales department can then use to independently generate complex quotes incorporating material and labor costs provided by accounting. An accepted quote can then automatically be turned into an order that incorporates a complete bill of materials list which includes routings. *Global Edge® - Product Configurator* also helps increase the productivity of your engineering department by providing a tool that enables quick processing of design and bill of materials information for the shop floor.

*Global Edge® - Product Configurator* has built-in flexibility that eliminates the need for custom programming and it works with most product lines. It allows engineering to standardized the rules of customization with features that include: Variable Size Components, Feature Option Lists, Option Dependencies, Component Selection Logic, Length / Width, Color / Style Choices, Load Capacity, Automated Routings, Automated Link to Production, Accurate Engineering and Manufacturing Cost Roll-Ups, and Minimization of Orphan Parts.

### **About Logic Design Corporation**

Logic Design Corporation, founded in 1983, headquartered in Brookfield, Wisconsin, is a developer of innovative software solutions for engineering and manufacturing. For more information, visit [www.ldcglobal.com](http://www.ldcglobal.com)
